Dear Hiring Manager,

I noticed you are hiring a developer.

I have found web development fascinating since I was a small child.

I'm up to date on on the latest trends. tools in web dev.

I have worked with Wordpress, Drupal, Joomla.

I use Javascript, jQuery on a daily basis. I am creating this very cover letter in photoshop. I know Html, CSS almost as well as English.

If your company can benefit from a passionate front end developer who doesn't mind spending his days debugging code, sipping joe, & staying up to date on current tools in web dev then contact me with an interview time at your earliest convenience.

Thank you,

Matt Shaver.
